

EXCLUSIVE SERVICES. INVALUABLE EXPERTISE.

bioMérieux has partnered with Sequence, Inc. – a leading provider of laboratory and quality compliance services – to manage nationwide distribution, service, and support for LABGUARD 3D systems. Together, bioMérieux and Sequence bring you flexible, precise solutions and an unmatched understanding of the day-to-day issues facing the clinical and industrial sectors.

-  Dedicated technical support hotline
-  Service agreements
-  Metrology services
-  On-site training
-  Online software updates

-  Calibration and mapping traceable or ISO 17025 certified
-  ISO 9001 certified for skill in increasing performance while following regulatory requirements
-  Qualification service available—IQ, OQ, PQ, and calibration certificate
-  Metrology certificates embedded

LABGUARD® 3D

Get peace of mind with comprehensive monitoring solutions.

PIONEERING DIAGNOSTICS

Optimize quality. Mitigate risks.

Keeping a laboratory safe and in compliance requires experience and systems you can trust. You need an all-inclusive monitoring solution to secure your environment and bring you peace of mind.

For more than 15 years, LABGUARD® has helped laboratories optimize quality standards, mitigate risks, and improve productivity. That expertise—combined with bioMérieux's 50 years of innovation in the clinical and industrial sectors—makes LABGUARD 3D a truly comprehensive solution. Meet your regulatory requirements while saving time, money, and labor costs.

MEASURE & RECORD. MONITOR & ALERT.

Versatile, precise monitoring of temperatures, humidity, and other physical parameters helps you address adverse events efficiently and protect your valuable work. LABGUARD 3D includes improved hardware, software, and services to meet the needs of a variety of sensitive environments—from laboratories and clinics to transport activities, professional kitchens, pharmacies, and storage facilities.

INTERACTIVE HARDWARE DESIGN.

- 360-degree, projected visual arms
- Integrated screen display
- Transmitter with up to four universal inputs
- Easy installation with automatic detection of new sensors

A 3D APPROACH TO MONITORING.

LABGUARD 3D is a complete package for monitoring lab environments. Our broad range of services and solutions adapt to your facility's unique challenges, making quality assurance and compliance tasks safer and easier.

Hardware: All necessary equipment for monitoring on and off-site parameters

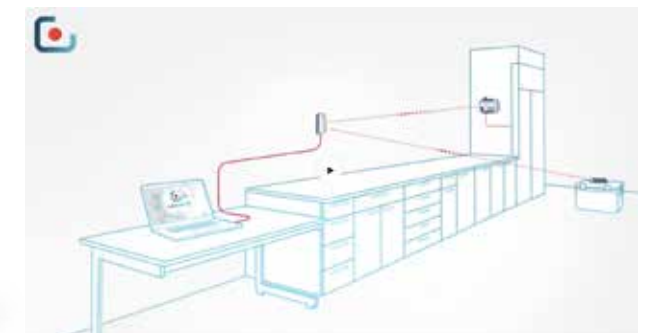

Software: Tracing, recording, and all monitoring data

Service: Installation, training, calibration, validation, and ongoing support

- Real-time monitoring
- Remote access—anytime, anywhere
- Radio and Ethernet transmitters
- Wide range of probes
- True Web Service solution for multi-site deployment

STAY IN COMPLIANCE WHILE REDUCING COSTS.

LABGUARD 3D delivers a cost-effective system that helps you develop and maintain quality standards.

STAY IN COMPLIANCE.

- Ensures sample integrity and product performance
- Eases ISO EN 17025 and 15189 compliance
- 21 CFR compliant software
- Access to a professional database (postgreSQL)
- Plug-and-play tools

REDUCE COSTS.

- Single software license installed on a virtual server
- Battery failure detection to reduce energy consumption
- Automated monitoring
- Wireless ISM technology minimizes implementation costs
